## Defender series

NORMAL

with DEFENDER

BROWN  
*(Blocks 96% Blue Light)*

ROSE  
*(Blocks 73% Blue Light)*

GREY  
*(Blocks 92% Blue Light)*

Defender Series represents three lenses that will redefine your opinion regarding the relationship between ideal vision and optics. Each lens cuts at least 90% of annoying and harmful high energy blue light while also absorbing substantial red and infrared rays. As a result, this scattered light color spectrum is reduced to harmless levels. Defender Series lenses can actually enhance your hand-eye-brain coordination and shorten your reaction time. We here at Gatorz haven't found a critic or activity where this performance, safety and comfort feature doesn't pay off threefold!
